Armstrong Air™
Mid-Efficiency Gas Furnaces
tech

Nothing makes a house a home like clean, soothing warmth. That's why we put so much thought into the energy-efficient Tech 80 gas furnace line. We packed it with family-friendly features for years of safe, trouble-free comfort. From cool summer nights to frigid winter days, your family deserves our very best in home comfort.

Home Comfort

Featuring a single-stage gas control system, the Tech 80 ensures reliable heat output to maintain even temperatures throughout the home. This means that your comfort never wavers, regardless of the changing weather conditions outside. It's this kind of dependable performance that exemplifies Armstrong Air™ quality.

Reliability

The System Sentry™ monitoring device helps assure safe, reliable and efficient operation by constantly monitoring and controlling the furnace. Should trouble occur, the System Sentry™ will provide service codes to a contractor to help quickly and accurately diagnose the problem.

The Tech 80 is engineered with quality components. Made with an aluminized steel heat exchanger to help resist corrosion and maintain long-lasting performance, the Tech 80 can provide years of trouble-free operation. Add the peace of mind of our impressive warranties and you have dependability that makes a difference.

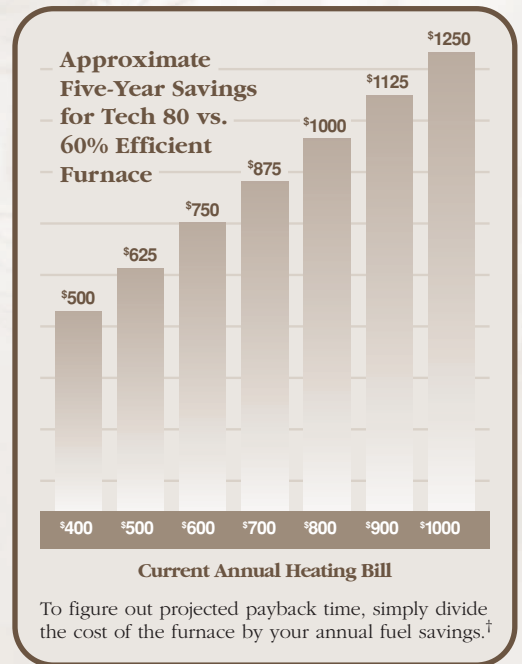

Quiet Operation

Features like a fully insulated cabinet, isolated blower mounting and a slow-opening gas valve provide quiet operation.

Energy Efficiency

The Armstrong Air™ Tech 80 furnace features an AFUE rating of up to 80.0%. That means less energy is required to maintain the comfort of your home when compared to older, less efficient furnaces. In the short term, you save on utility bills. And in the long term, the energy savings can exceed what you paid for your furnace.† Now that's a smart investment!

The following chart illustrates potential savings vs. a 10-year-old furnace with a 60% efficiency rating.

†Actual savings dependent on furnace and installation.
