

Free Duct Cleaning we replace your old forced air furnace or your old air conditioner.

According to the ENVIRONMENTAL PROTECTION AGENCY...Your INDOOR AIR IS UP TO 100 TIMES DIRTIER than outside.

When the coughing and sneezing starts is when we usually start getting phone calls for cleaning ducting. Coughing usually begins as dry, hacking cough which may develop from an upper respiratory irritant, such as a dust and debris that can fly about your home through the use of your forced air heating and air conditioning system.

An air duct cleaning and repair service, may not be the first thing that comes to mind when discussing your home maintenance..... but in all reality, it is often this forgotten service that can be your key to better health through cleaning indoor air.

If you are looking for a company to clean your ducting, be cautious, your system cannot be properly cleaned without removing electrical components, blowers, housing and other parts of your system. This can only be performed by a licensed heating and air conditioning contractor.

Many Duct Cleaning Companies do More Harm Than Good

Carpet cleaning companies should not be tearing into your heating and air conditioning system anymore than your gardener should be roofing your home. Brushes through some types of flex duct can and do destroy the ducting. High pressure air in ducting that contains asbestos can do contaminate the entire home.

If your ducting is dirty, there is a reason and we will find out why.

This is a free service because when we install a new furnace or new air conditioner for you we tend to disturb the ducting and that disturbance tends to knock accumulated dust in the ducting around. When we turn on the furnace or air conditioner the dust flies through the home.

We can prevent this, you don't have to pay one single dime for it.

If, you are looking for a Company, which can really eliminate a dust problem and clean the air in your home, your search is ended... You've just found one.
